Dear FCC and Congress, XM Satellite Radio has been the best thing that any company has ever had to offer to me. I pay for their services and have never once wanted to cancel or stop payment. They make sure we receive the most respect and make all the XM listeners a true family! This attack against them is nonsense, ridiculous, and absurd. They are only doing their job.....actually they are doing more than that! They are doing such a great job of going above and beyond for their listeners and the future ones to come.... that, other companies feel threatend and ashamed of their own laziness to try and succeed with continuous efforts. Is it XM's fault that they had no intentions of improving???? NO! Is it XM's fault they didn't improve fast enough????? NO! All XM Radio did was provide all their subscribers and listeners with the MOST they could possibly offer and more!!! And XM has every intention of continuing to improve to continue being the best product and services that any company could ever offer. Its there job as a company to get all the facts...especially for the traffic and weather station(s). Is it a crime to provide factual information about weather and traffic?? Because that could actually save your life or benefit you in a lot of situations. By providing us with facts....unlike TV weather stations and reporters... we can plan our time wisely and have more time to spend with our families, loved ones, and friends! Its a shame people have to try and ruin everything that was worked so hardly for even when they continue to improv. I feel these alligations and assumptions against XM Radio must be dropped becuae you guys are trying to ruin their ammendments and rights as a company and ours as an indiviual. Please tell the other companies that they need to worry about how they wish to succeed, not wish to fall. THANK YOU XM RADIO FOR PROVIDING ME WITH SATISFACTION AND THE CONTINUOUS EFFORTS THAT I WAS SEARCHING FOR!!! YOU ARE THE BEST!!

Thank you,

Dennis S. Lamb Jr. (A listener who is proud to be a part of the XM Radio family and has no intentions of ever going back to FM or AM stations ever again!!!)
